DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 1-8, and 11 is withdrawn in view of the rejection under 35 U.S.C. 101. Rejections based on the newly cited reference(s) follow.

Claims 12 and 14-23 are allowed.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8, and 11 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In particular, claim 1 is drawn to a process. Under 35 U.S.C. § 101 a process must 1) be tied to a particular machine or apparatus or 2) transform underlying subject matter such as an article to a different state or thing (see *In re Bilski*, 545 F.3d 943, 88 USPQ2d 1385 (Fed. Cir. 2008)).

In regards to condition 1, the claimed process steps are not tied to any particular machine or apparatus, and as such can be performed by hand or as mental steps. To qualify as a 35 U.S.C. § 101 statutory process under condition 1, the claim should positively recite the other statutory class (apparatus or thing) to which it is tied, for example by identifying the apparatus that accomplishes the method steps in the body of the claim.

In regards to condition 2, the claimed process steps do not transform underlying subject matter. To qualify as a 35 U.S.C. § 101 statutory process under condition 2, the claim should

recite steps to transform underlying subject matter into a useful, concrete, and tangible result. In this case the method is not tangible because *real-world result*, for example providing treatment to a patient.
